

Choice of 5 types:

- Vincent®s Choice: orange with dark heart
- Vincent®s Choice Deep Orange: smaller top leaves
- Vincent®s Choice Deep Orange **DMR**: Downy Mildew Resistant
- Vincent®s Fresh: fresh green heart
- Vincent®s Pomelo: clear yellow, dark heart

Features:

- Large round ribbon flowers
- Flowers are tilted forward
- Excellent sustainability
- Solid green stem

Keuze uit 5 soorten:

- Vincent®s Choice: oranje met donker hart
- Vincent®s Choice Deep Orange: kleinere kopbladen
- Vincent®s Choice Deep Orange **DMR**: valse meeldauw resistent
- Vincent®s Fresh: fris groen hart
- Vincent®s Pomelo: helder geel met donker hart

Kenmerken:

- Grote ronde lintbloemen
- Bloemen staan schuin naar voren
- Uitstekende houdbaarheid
- Stevige groene steel

Auswahl zwischen fünf Sorten:

- Vincent®s Choice: orange mit dunkler Scheibe
- Vincent®s Choice Deep Orange: kleinere obere Blätter
- Vincent®s Choice Deep Orange **DMR**: falscher Mehltau resistent
- Vincent®s Fresh: frisch-grüne Scheibe
- Vincent®s Pomelo: gelb mit dunkler Scheibe

Eigenschaften:

- Große runder Zungenblüten
- Nach vorne geneigte Blüten
- Ausgezeichnete Haltbarkeit
- Feste grüne Stiele

Un choix parmi 5 types:

- Vincent®s Choice: orange avec cœur foncé
- Vincent®s Choice Deep Orange: feuilles supérieures plus petites
- Vincent®s Choice Deep Orange **DMR**: résistant au mildiou
- Vincent®s Fresh: cœur vert rafraichissant
- Vincent®s Pomelo: jaune pâle, cœur foncé

Caractéristiques:

- Grande fleurs ruban rondes
- Les fleurs sont inclinées vers l'avant
- Excellente durabilité
- Solide tige verte

5 diverse possibilità:

- Vincent®s Choice: a cuore Nero
- Vincent®s Choice Deep Orange: foglie apicali piccole
- Vincent®s Choice Deep Orange **DMR**: resistente a peronospora
- Vincent®s Fresh: a cuore verde
- Vincent®s Pomelo: giallo brillante a cuore nero

Caratteristiche:

- Grandi fiori rotondi del nastro
- I fiori sono inclinate in avanti
- Eccellente durata
- Solido stelo verde

5 odmian do wyboru:

- Vincent®s Choice: pomarańczowy z czarnym środkiem
- Vincent®s Choice Deep Orange: mniejsze liście szczytowe
- Vincent®s Choice Deep Orange **DMR**: odporność na mączniaka rzekomego
- Vincent®s Fresh: jasnozielony środek
- Vincent®s Pomelo: żółty z czarnym środkiem

Cechy:

- Duże zaokrąglone płatki
- Kwiaty efektywnie nachylone ku patrzącemu
- Wyśmienita trwałość
- Mocny, zielony pęd

Vincent®s

...Your Choice!

Vincent®s ...Your Choice!

Helianthus Vincent®s Series - Flexibility in programming

- Less sensitive to day length than other Sunflowers for greater flexibility in programming
- Better height under short days, not too tall under long days
- Allows growers to produce high quality crops early, mid and late season
- An extra ring of rounded, overlapping petals for better filled, more attractive flower heads
- Flowers face upwards on strong stems and necks
- Shorter crop cycle and concentrated harvest means increased margins
- Strong seeding and plant vigour

Vincent®s Choice

Vincent®s Choice
Orange petals, dark heart

Vincent®s Choice Deep Orange
smaller top leaves

Vincent®s Choice Deep Orange **DMR**
Downy Mildew Resistant

Vincent®s Fresh

Fresh green heart,
orange petals

Vincent®s Pomelo

Clear yellow petals, dark heart
* Normal day length sensitivity

Vincent®s Choice Deep Orange **DMR**

The Natural Answer to Downy Mildew infection in Sunflowers

- Downy mildew has created an increasing problem in Sunflower crops for the last 10 years
- It can be categorised as a fungal infection that is transmitted primarily through ground (systemic) infection and secondarily through air-borne infection
- Up until now, the only methods used to fight the disease were use of chemicals and crop rotation
- Chemical pesticides are environmentally unfriendly, prone to development of resistance and often subject to legislation
- Crop rotation is impractical, costly and ineffective
- The ideal solution is a variety that is naturally resistant to the fungus. In vegetables, mildew-resistant varieties have been bred and implemented on a wider scale
- Following 3 years of successful testing under European conditions, Sakata introduces a new sunflower variety we can confidently claim to be Downy Mildew Resistant*
- In tests and trials, Vincent®s Choice Deep Orange **DMR** proved resistant to general spores of Downy Mildew infection currently recognized in Europe

* ISF Definition of Resistance:

Resistance is the ability of a plant variety to restrict the growth and development of a specified pest and /or the damage they cause when compared to susceptible plants varieties under similar environmental conditions and pest pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest pressure.

Healthier plants = more yield = more profits
