

SUNFLOWER F₁ SUNRICH SERIES

Helianthus annuus

COLORS AVAILABLE:	Lemon, Orange, Gold (New)
SIZE/PLANT HABIT/TYPE:	48" – 60" Single stem, 5" to 6" flower Annual
NOVELTY CHARACTERISTIC:	Early, male sterile (pollen free) flowers, bright colors with contrasting centers
MARKET USE:	Cut flower
CULTURAL RECOMMENDATIONS:	
SEASONAL APPLICATION:	
SOWING:	Spring, Summer
FINISHING:	Summer, Fall
PHOTOPERIODISM:	Flowering accelerated under short days
PLUG STAGE:	
GERMINATION:	75 °F
TRAY SIZE:	Not recommended for Plugs – direct sow
FINISHING:	
TRANSPLANT:	Direct Sow
SPACING:	5"
DAYS TO FLOWER:	60-65 days
TEMPERATURE:	Minimum growing temperature of 60-65°F (12-15°C)
EC:	1.75-3.0 mS/cm (pour thru method)
pH:	6.0-6.5
COMMON DISEASE/PESTS:	Botrytis, Mildew/Aphids, Thrips, Leaf rollers

NOTES:

- Sunflowers usually require full sun in order to bloom.
- In comparison to Sunbright, this variety blooms 10 days earlier in the spring and 5 days earlier in the summer. It is also two weeks earlier than 'The Sun'
- Grow them densely and do not over fertilize. (IF lower leaves begin turning yellow, give liquid fertilizer to keep the leaves a clear green color.)
- With excessive fertilizer they will become too large for cut flowers.
- A good cut flower of this variety will have a height of about 2-2 ½ feet, and the flower will be 5-6 inches in diameter.
